## E-SepFree

Let us  
print your  
part!<sup>1</sup>

EnvisionTEC's revolutionary new E-SepFree is the only 3D printable dental model material that fulfills two special needs in the dental industry that haven't previously been possible with 3D printed models.

It is easy to release when directly building orthodontic appliances as it does not require a separator. It is also easy to carve when hand contouring contact areas, opening interproximals, and much more.

E-SepFree produces high-resolution models with crisp detail without sacrificing speed or accuracy.

Material Properties <sup>2</sup>	
Description	Value
Melting Point	250°C
Density	1.05 g/cm <sup>3</sup>
Color(s)	Opaque yellow

Recommended 3D Printer Family <sup>3</sup>
P4K Family
