PWA 2000 XL

The PWA 2000 XL is an industrial-grade cleaner, created for cleaning large parts with its unique motion system allowing for complete cleaning, even in parts with very complex details.

The tank is equipped with the push & pull system to take objects out without putting your hands into the liquid. The PWA 2000 XL is safe, transportable, and non-flammable. It works safely and improves the curing performance and surface layer of your prints.

Its convenient drain allows for easy disposal of the used liquid.
